

Rowan-Cabarrus Community College presents

BioWork

Mondays & Wednesdays

Feb. 4 – May 26, 2008 • 8:00 am – 12:00 noon

Cabarrus Business & Technology Center • 660 Concord Parkway North, Concord, NC
Registration Fee: \$65.00 Text: approx. \$100.00

- **A unique course for an emerging industry**

BioWork is a 132-hour introductory course exploring the basics of manufacturing technology and the fundamentals of science. Selected units can be taught based on company or employee needs.

- **A priority on quality**

BioWork teaches students what quality means and why it matters. Overviews of current quality systems will be discussed, such as detailed treatment of cGMP (current Good Manufacturing Practices) as an example of a comprehensive quality system. Graduates understand that a quality product depends on strict attention given to standards and procedures for every task.

- **An emphasis on safety**

BioWork students graduate with a safety mindset. Students understand common hazards in the workplace, critical OSHA requirements, the importance of personal protective clothing and equipment safety measures.

- **Built-in communication, teamwork, and problem-solving**

Technical knowledge and skill is not enough. Successful employees need the abilities to effectively communicate, work as a team, and solve problems.

Prerequisites: • High School Diploma or GED • Basic computer literacy
• Career Readiness Assessment

Pre-registration, Career Readiness Counseling, and Information Session attendance are required and must be scheduled by **January 28**. To schedule an appointment for Career Readiness Counseling and Assessment contact the Career Readiness Center:
